

Books for Teachers:

The Praise of Education

This collection hopes to expand teachers' panoramas on education, because, just as students, they are constantly learning. Guided by extraordinary artists and thinkers such as Mario Vargas Llosa, Jaime Labastida, Martha Nussbaum, and others, this collection invites teachers to question and exercise self-criticism and ambition to learn.

These marvelous texts highlight themes of analysis and reflection like poetry, philosophy, pedagogy, art, science, and others.
